

Our Satisfied Clients Say...

Your guys are great, they did a good job, my air conditioner is definitely better and cooler than yesterday.

*Janice Tseng
Hougang*

We have been very pleased with their quality of service that AZIL has given us when we have used their services on a number of occasions.

*Ros Currey
Ang Mo Kio*

Thanks so much for being prompt in attending to our leaking air conditioning system. The guys were great – very thorough and quick too.

*Marina Mathews
River Valley*

Thanks for attending to our urgent request to repair our air con. Now, our daughter can sleep peacefully.

*Ahmad Kamal
Woodlands*

TAILORED TO YOUR NEEDS

It would be beneficial for you to service & maintain your air conditioners to its optimum condition.

AZIL specialize in service & repair of all kinds and types of air conditioner equipments depending on your needs.

▶ GENERAL SERVICE

It's very important to have your air conditioner check and service regularly by qualified technicians. Not only you will breath in a more fresher air for a better health. You can also save on energy cost and extend your equipment life span.

▶ CHEMICAL CLEANING

If your air conditioner has been working for years without proper maintenance, then it's time for you to have your equipment to go for an overhaul or better known as Chemical Cleaning.

▶ CONTRACT MAINTENANCE

This is the best way to keep your air conditioner equipment in tip top working condition. Just leave the maintenance problem to us.

▶ TROUBLE SHOOTING & REPAIR

Having problem with your air-con and need help in solving the problem. Book an appointment now for a free inspection. No obligation after inspection.

TAILORED TO YOUR BUDGET

We tailor a servicing or maintenance program to meet your specific needs and budget requirements. Our servicing or maintenance packages will range from monthly, bi-monthly, quarterly or bi-annually.

We offer a range of preventive and comprehensive maintenance packages that will keep your air conditioning operates in its peak performance. Or, if you prefer, we can also offer a range of attractive servicing or maintenance packages to one-off service and repair calls, which covers service and maintenance.

FREQUENTLY ASKED QUESTIONS

Why is there water leaking at the air conditioner (Indoor Unit) ?

This is because water is not drained out from the drainage pipe or water is being trapped in the pipe which is blocked by dirty particles. Please contact qualified service technician to attend to your air-con.

Why is my air conditioner (Indoor Unit) not cold?

- Air Filer dirty
- Object blocking the air inlet/outlet of the indoor/outdoor units
- Temperature set too high
- Windows and doors are opened
- Airflow direction is not appropriately set
- Remote controller is not in the cooling mode
- Parts may be faulty

Why is my air conditioner (Indoor Unit) noisy?

The blower of the air conditioner may be dirty. Please contact qualified service man to service your air-con.

What will happen if I do not do any servicing?

The life span of the air conditioner will be shortened, coolness decreases with usage and water-leaking problem may occur. Electricity consumption increases due to inefficiency operation.

How can we maintain the air-conditioner on our own?

You can perform cleaning of the air filter and the outside panel every 2 weeks.
